

TEENAGE MUTANT NINJA TURTLES®

Kids,
follow these
simple blueprints,
it's easy!

Direction

- Open the gullwing hinge hatch and place one (1) Foot Clan figure in the cockpit seat, one (1) manning the rotating rear stone shooter, and one (1) on each side of the module body hanging onto the Foot handles. Close the gullwing hinged hatch.
- Push the Mutant Module forward. The rotating dirt diggin' drill will start to spin and bore the Turtle teens — to death!

Assembly

- Attach four (4) foot claws to four (4) filthy foot tunneling treads, and attach two (2) filthy foot tunneling treads to each side of the module body as shown.
- Attach rotating dirt diggin' drill and twelve (12) dirty drill bore bits to front of module body as shown.
- Attach two (2) intake manifolds, two (2) top treads, two (2) foot handles, and two (2) fold down rock liquidizing lasers to module body as shown.
- Attach one (1) rock blastin' missile to the top of each gullwing hatch as shown.
- Attach rocket exhaust and two (2) tunneling turbos to rear of module body as shown.
- Attach one (1) exhaust pipe to each side of module body as shown.
- Attach three (3) exhaust tubes to each side of rocket exhaust and rear of module body as shown.
- Attach labels 1-6 as shown.
